ENERGY POLICY

Index to Volume 29

January, February, March, April, May, June, July, August, September, October, November, December

Articles—Titles

Coal

A study of productivity in the Indian coal sector *M Kulshreshtha and J K Parikh* 29:9, 701–713

Analysis of the impacts of carbon taxes on energy systems in Japan *T Nakata T and A Lamont* 29:2, 159–166

Carbon emissions from manufacturing energy use in 13 IEA countries; long-term trends through 1995 *L Schipper, S Murtishaw, M Khrushch, M Ting, S Karbuz and F Unander* 29:9, 667–688

Is coal desulphurisation worthwhile? Evidence from the market *J B Braden, C D Kolstad, R A Woock and J A Machado* 29:3, 217–225

Strategic considerations for clean coal R&D *J T McMullan, B C Williams and S McCahey* 29:6, 441–452

Electricity

A model-based analysis of strategic consolidation in the German electricity industry *J Bower, D W Bunn and C Wattendrup* 29:12, 987–1005

Accelerating residential PV expansion: supply analysis for competitive electricity markets *A Payne, R Duke and R H Williams* 29:10, 787–800

Changes in fuel input of electricity sector in Hong Kong since 1982 and their implications *L C-h Chow* 29:15, 1399–1410

Credible regulatory threats *M Acutt, C Elliott and T Robinson* 29:11, 911–916

Eco-labeling of electricity – strategies and tradeoffs in the definition of environmental standards *B Truffer, J Markard and R Wüstenhagen* 29:11, 885–897

Economic justification of the Snowy scheme *H W M Lumley* 29:11, 927–937

Electricity sector analysis in the clean energy futures study *S W Hadley and W Short* 29:14, 1285–1298

Electricity tariffs in India: an assessment of consumers' ability and willingness to pay in Gujarat *R K Bose and M Shukla* 29:6, 465–478

Emergence of financial markets for electricity: a European perspective *E Mork* 29:1, 7–15

Finessing the unintended outcomes of price-cap adjustments: an electric utility multi-product perspective *D Q Sceto, C K Woo and I Horowitz* 29:13, 1111–1118

From planning to strategy in the electricity industry *I Dyner and E R Larsen* 29:13, 1145–1154

Impacts of biomass power generation and CO_2 taxation on electricity generation expansion planning and environmental emissions *J Santisirisomboon, B Limmeechokchai and S Chungpaibulpatana* 29:12, 975–985

Inertia in the North American electricity industry: is it realistic to think that the Kyoto Protocol objectives can be met? *C Jacques, G Lafrance and J A Doucet* 29:6, 453–463

Is coal desulphurisation worthwhile? Evidence from the market *J B Braden, C D Kolstad, R A Woock and J A Machado* 29:3, 217–225

Modernise it, sustainabilise it! Swiss energy policy on the eve of electricity market liberalisation *M Jegen and R Wüstenhagen* 29:1, 45–54

Norwegian residential electricity demand – a microeconomic assessment of the growth from 1976 to 1993 *B Halvorsen and B M Larsen* 29:3, 227–236

Power sector reform and distributed generation in sub–Saharan Africa *J Turkson and N Wohlgemuth* 29:2, 135–145

Price caps and investment: long-run effects in the electric generation industry *J H Grobman and J M Carey* 29:7, 545–552

Privatizing and liberalizing electricity, the case of Hungary *G Bakos* 29:13, 1119–1132

Renewables portfolio standard: a means for trade with electricity from renewable energy sources? *S Espey* 29:7, 557–566

The Danish electricity reform *J Hauch* 29:7, 509–521

The financing of the Mexican electrical sector *J Islas and U Jerónimo* 29:12, 965–973

US consumers' willingness to pay for green electricity *B Roe, M F Teisl, A Levy and M Russell* 29:11, 917–925

Waiting for the boom: a simulation study of power plant construction in California *A Ford* 29:11, 847–869

Energy conservation and efficiency

Addressing energy-related challenges for the US buildings sector: results from the clean energy futures study *J G Koomey, C A Webber, C S Atkinson and A Nicholls* 29:14, 1209–1221

Auditing energy use in cities *M Bennett and M Newborough* 29:2, 125–134

Computer system for energetic diagnoses in residential customers *N G Ramos, C Heard, E R Fiscal, Z M Maqueda, S L Morales, R M Salazar, B R Ceja and L J Gutiérrez* 29:8, 595–603

Cost-benefit analysis of domestic energy efficiency *J P Clinch and J D Healy* 29:2, 113–124

Disaggregated analysis of US energy consumption in the 1990s: evidence of the effects of the internet and rapid economic growth *S Murtishaw and L Schipper* 29:15, 1335–1356

Drivers of market transformation: analysis of the Hungarian lighting success story *D Ürge-Vorsatz and J Hauff* 29:10, 801–810

Electricity sector analysis in the clean energy futures study *S W Hadley and W Short* 29:14, 1285–1298

Energy efficiency: the challenges of policy design *F Varone and B Aebischer* 29:8, 615–629

Energy and the environment in Kazakhstan *C Dahl and K Kuralbayeva* 29:6, 429–440

Energy futures for the US transport sector *D L Greene and S E Plotkin* 29:14, 1255–1270

Estimating bounds on the economy-wide effects of the CEF policy scenarios *A H Sanstad, S J DeCanio, G A Boyd and J G Koomey* 29:14, 1299–1311

European and Japanese fuel economy initiatives: what they are, their prospects for success, their usefulness as a guide for US action *S E Plotkin* 29:13, 1073–1084

Impact on global warming of development and structural changes in the electricity sector of Guangdong Province, China *C Zhang, M M May and T C Heller* 29:3, 179–203

Interactions of a tradable green certificate market with a tradable permits market *P E Morthurst* 29:5, 345–353

Methods of evaluating market transformation programmes: experience in Sweden *L Neij* 29:1, 67–79

Policy scenarios for energy efficiency improvement in industry *Worrell, E and Price, L* 29:14, 1223–1241

Renewable energy policy in Lithuania *V Katinas and R Skema* 29:10, 811–816

Scenarios for a clean energy future *M A Brown, M D Levine, W Short and J G Koomey* 29:14, 1179–1196

Sustainable energy and urban form in China: the relevance of community energy management *B Sadownik and M Jaccard* 29:1, 55–65

Technology development in market networks *B Olerup* 29:3, 169–178

The Danish electricity reform *J Hauch* 29:7, 509–521

The quality of energy intensity indicators for international comparison in the iron and steel industry *J C M Farla and K Blok* 29:7, 523–543

World bank energy projects in China: influences on environmental protection *E Martinot* 29:8, 581–594

Energy and the environment

A time-series analysis of energy-related carbon emissions in Korea *K-H Choi and B W Ang* 29:13, 1155–1161

A transition toward a sustainable energy future: feasibility assessment and development strategies of wind power in Taiwan *C-D Yue, C-M Liu and E M L Liou* 29:12, 951–963

Analysis of energy intensity developments in manufacturing sectors in industrialized and developing countries *A Miketa* 29:10, 769–775

Auditing energy use in cities *M Bennett and M Newborough* 29:2, 125–134

Beyond joint implementation–designing flexibility into global climate policy *K G Begg, T Jackson and S Parkinson* 29:1, 17–27

Biomass for energy or materials? A Western European systems engineering perspective *D J Gielen, M A P de Feber, A J M Bos and T Gerlagh* 29:4, 291–302

Carbon emissions control and trade liberalization: coordinated approaches to Taiwan's trade and tax policy *H-Y Yang* 29:9, 725–734

Carbon emissions from manufacturing energy use in 13 IEA countries: long-term trends through 1995 *L Schipper, S Murtishaw, M Khrushch, M Ting, S Karbuz and F Unander* 29:9, 667–688

Citizen versus consumer: challenges in the UK green power market *S L Batley, D Colbourne, P D Fleming and P Urwin* 29:6, 479–487

CO_2 accounts for open economies: producer or consumer responsibility? *J Munksgaard and K A Pedersen* 29:4, 327–334

CO_2 emissions in the Brazilian industrial sector according to the integrated energy planning model (IEPM) *M T Tolmasquim, C Cohen and A S Szklo* 29:8, 641–651

Consumers, industrialists and the political economy of green taxation: CO_2 taxation in OECD *G T Svendsen, C Daugbjerg, L Hjollund and A B Pedersen* 29:6, 489–497

Cost-effective reductions of non-CO_2 greenhouse gases *F de la Chesnaye, R Harvey, D Kruger and J A Laitner* 29:14, 1325–1331

Differentiating commitments world wide: global differentiation of GHG emissions reductions based on the Triptych approach – a preliminary assessment *H Groenenberg, D Phylipsen and K Blok* 29:12, 1007–1030

Dismantling of nuclear power in Germany: sectoral and macroeconomic effects *H Welsch and C Ochsen* 29:4, 279–289

Do model structures affect findings? Two energy consumption and CO_2 emission scenarios for Brazil in 2010 *R C da Costa* 29:10, 777–785

Eco-labeling of electricity – strategies and tradeoffs in the definition of environmental standards *B Truffer, J Markard and R Wüstenhagen* 29:11, 885–897

Endogenising emission taxes: A general equilibrium type optimisation model applied for Turkey *Y Arykan and G Kumbarolu* 29:12, 1045–1056

Energy and the environment in Kazakhstan *C Dahl and K Kuralbayeva* 29:6, 429–440

Energy intensity, CO_2 emissions and the environmental Kuznets curve. The Spanish case *J Roca and V Alcántara* 29:7, 553–556

Estimating CO_2 abatement and sequestration potentials for Chile *A Mosnaim* 29:8, 631–640

Greenhouse gas taxation and the distribution of costs and benefits: the case of Norway *O Godal and B Holtsmark* 29:8, 653–662

Impacts of biomass power generation and CO_2 taxation on electricity generation expansion planning and environmental emissions *J Santisirisomboon, B Limmeechokchai and S Chungpaibulpatana* 29:12, 975–985

Inertia in the North American electricity industry: is it realistic to think that the Kyoto Protocol objectives can be met? *C Jacques, G Lafrance and J A Doucet* 29:6, 453–463

International emissions trading under the Kyoto Protocol: credit trading *J-T Boom* 29:8, 605–613

Lost carbon emissions: the role of non-manufacturing other industries and refining in industrial energy use and carbon emissions in IEA countries *S Murtishaw, L Schipper, F Unander, S Karbuz and M Khrushch* 29:2, 83–102

Low-CO_2 energy pathways and regional air pollution in Europe *S Syri, M Amann, P Capros, L Mantzos, J Cofala and Z Klimont* 29:11, 871–884

Market failures and barriers as a basis for clean energy policies *M A Brown* 29:14, 1197–1207

Multi-lateral emission trading: lessons from inter-state NO_x control in the United States *A Farrell* 29:13, 1061–1072

On the potential impacts of land use change policies on automobile vehicle miles of travel *F Southworth* 29:14, 1271–1283

Public goods and private interests: understanding non-residential demand for green power *R H Wiser, M Fowlie and E A Holt* 29:13, 1085–1097

Scenarios for a clean energy future *M A Brown, M D Levine, W Short and J G Koomey* 29:14, 1179–1196

Structural decomposition of CO_2 emissions from Taiwan's petrochemical industries *C F Lee and S J Lin* 29:3, 237–244

The efficiency of international cooperation in mitigating climate change: analysis of joint implementation, the clean development mechanism and emission trading for the Federal Republic of Germany, the Russian Federation and Indonesia *W Fichtner, M Goebelt and O Rentz* 29:10, 817–830

The liability rules under international GHG emissions trading *ZX Zhang* 29:7, 501–508

The problem of used nuclear fuel: lessons for interim solutions from a comparative cost analysis *A Macfarlane* 29:15, 1379–1389

The renewable portfolio standard: design considerations and an implementation survey *T Berry and M Jaccard* 29:4, 263–277

The social cost of district heating in a sparsely populated country *E Bowitz and M D Trong* 29:13, 1163–1173

Towards a private–public synergy in financing climate change mitigation projects *ZX Zhang and A Maruyama* 29:15, 1363–1377

Uncertainty in estimating and mitigating industrial related GHG emissions *M El-Fadel, M Zeinati, N Ghaddar and T Mezher* 29:12, 1031–1043

World bank energy projects in China: influences on environmental protection *E Martinot* 29:8, 581–594

Energy modelling

A model-based analysis of strategic consolidation in the German electricity industry *J Bower, D W Bunn and C Wattendrup* 29:12, 987–1005

An eclectic approach in energy forecasting: a case of Natural Resources Canada's (NRCan's) oil and gas outlook *A J Persaud and U Kumar* 29:4, 303–313

An evaluation of the impact of reducing energy subsidies on living expenses of households *Y Saboohi* 29:3, 217–225

Analysis of energy intensity developments in manufacturing sectors in industrialized and developing countries *A Miketa* 29:10, 769–775

Biomass for energy or materials? A Western European systems engineering perspective *D J Gielen, M A P de Feber, A J M Bos and T Gerlagh* 29:4, 291–302

Carbon emissions control and trade liberalization:coordinated approaches to Taiwan's trade and tax policy *H-Y Yang* 29:9, 725–734

CO_2 emissions in the Brazilian industrial sector according to the integrated energy planning model (IEPM) *M T Tolmasquim, C Cohen and A S Szklo* 29:8, 641–651

Computer system for energetic diagnoses in residential customers *N G Ramos, C Heard, E R Fiscal, Z M Maqueda, S L Morales, R M Salazar, B R Ceja and L J Gutiérrez* 29:8, 595–603

Cooperation in global climate policy: potentialities and limitations *D Ipsen, R Rösch and J Scheffan* 29:4, 315–326

Cost-benefit analysis of domestic energy efficiency *J P Clinch and J D Healy* 29:2, 113–124

Cost-effective reductions of non-CO_2 greenhouse gases *F de la Chesnaye, R Harvey, D Kruger and J A Laitner* 29:14, 1325–1331

Dismantling of nuclear power in Germany: sectoral and macroeconomic effects *H Welsch and C Ochsen* 29:4, 279–289

Do model structures affect findings? Two energy consumption and CO_2 emission scenarios for Brazil in 2010 *R C da Costa* 29:10, 777–785

Endogenising emission taxes: A general equilibrium type optimisation model applied for Turkey *Y Arykan and G Kumbarolu* 29:12, 1045–1056

Estimating bounds on the economy-wide effects of the CEF policy scenarios *A H Sanstad, S J DeCanio, G A Boyd and J G Koomey* 29:14, 1299–1311

Estimating CO_2 abatement and sequestration potentials for Chile *A Mosnaim* 29:8, 631–640

Is coal desulphurisation worthwhile? Evidence from the market *J B Braden, C D Kolstad, R A Woock and J A Machado* 29:3, 217–225

Learning rates for energy technologies *A McDonald and L Schrattenholzer* 29:4, 255–261

Low-CO_2 energy pathways and regional air pollution in Europe *S Syri, M Amann, P Capros, L Mantzos, J Cofala and Z Klimont* 29:11, 871–884

Methods of evaluating market transformation programmes: experience in Sweden *L Neij* 29:1, 67–79

Policy scenarios for energy efficiency improvement in industry *Worrell, E and Price, L* 29:14, 1223–1241
Short-cut design of wind farms *C T Kiranoudis, N G Voros and Z B Maroulis* 29:7, 567–578
Strategic considerations for clean coal R&D *J T McMullan, B C Williams and S McCahey* 29:6, 441–452
Strategies for cost-effective carbon reductions: a sensitivity analysis of alternative scenarios *E Gumerman, J G Koomey and M A Brown* 29:14, 1313–1323
Technological progress and long-term energy demand – a survey of recent approaches and a Danish case *H K Jacobsen* 29:2, 147–157
The efficiency of international cooperation in mitigating climate change: analysis of joint implementation, the clean development mechanism and emission trading for the Federal Republic of Germany, the Russian Federation and Indonesia *W Fichtner, M Goebelt and O Rentz* 29:10, 817–830
Waiting for the boom: a simulation study of power plant construction in California *A Ford* 29:11, 847–869

Energy policy and analysis

A transition toward a sustainable energy future: feasibility assessment and development strategies of wind power in Taiwan *C-D Yue, C-M Liu and E M L Liou* 29:12, 951–963
Beyond joint implementation – designing flexibility into global climate policy *K G Begg, T Jackson and S Parkinson* 29:1, 17–27
Carbon emissions control and trade liberalization:coordinated approaches to Taiwan's trade and tax policy *H-Y Yang* 29:9, 725–734
Citizen versus consumer: challenges in the UK green power market *S L Batley, D Colbourne, P D Fleming and P Urwin* 29:6, 479–487
Consumers, industrialists and the political economy of green taxation: CO_2 taxation in OECD *G T Svendsen, C Daugbjerg, L Hjollund and A B Pedersen* 29:6, 489–497
Cooperation in global climate policy: potentialities and limitations *D Ipsen, R Rösch and J Scheffan* 29:4, 315–326
Differentiating commitments world wide: global differentiation of GHG emissions reductions based on the Triptych approach – a preliminary assessment *H Groenenberg, D Phylipsen and K Blok* 29:12, 1007–1030
Endogenising emission taxes: A general equilibrium type optimisation model applied for Turkey *Y Arikan and G Kumbaroglu* 29:12, 1045–1056
Energy efficiency: the challenges of policy design *F Varone and B Aebischer* 29:8, 615–629
Energy and the environment in Kazakhstan *C Dahl and K Kuralbayeva* 29:6, 429–440
Estimating bounds on the economy-wide effects of the CEF policy scenarios *A H Sanstad, S J DeCanio, G A Boyd and J G Koomey* 29:14, 1299–1311
From planning to strategy in the electricity industry *I Dyner and E R Larsen* 29:13, 1145–1154
Greenhouse gas taxation and the distribution of costs and benefits: the case of Norway *O Godal and B Holtsmark* 29:8, 653–662
Inertia in the North American electricity industry: is it realistic to think that the Kyoto Protocol objectives can be met? *C Jacques, G Lafrance and J A Doucet* 29:6, 453–463
International emissions trading under the Kyoto Protocol: credit trading *J-T Boom* 29:8, 605–613
Market failures and barriers as a basis for clean energy policies *M A Brown* 29:14, 1197–1207
Multi-lateral emission trading: lessons from inter-state NO_x control in the United States *A Farrell* 29:13, 1061–1072
Policy scenarios for energy efficiency improvement in industry *Worrell, E and Price, L* 29:14, 1223–1241
Reforms in the French power system: from weak contestability to effective competition? *D Finon* 29:10, 755–768
Renewable energy investment by the World Bank *E Martinot* 29:9, 689–699
Rural household energy consumption with the economic development in China: stages and characteristic indices *W Xiaohua and F Zhenmin* 29:15, 1391–1397
Strategies for cost-effective carbon reductions: a sensitivity analysis of alternative scenarios *E Gumerman, J G Koomey and M A Brown* 29:14, 1313–1323
Structural decomposition of CO_2 emissions from Taiwan's petrochemical industries *C F Lee and S J Lin* 29:3, 237–244
Technology transfer of energy efficiency technologies in industry: a review of trends and policy issues *E Worrell, R van Berkel, Z Fengqi, C Menke, R Schaeffer and R O Williams* 29:1, 29–43
The financing of the Mexican electrical sector *J Islas and U Jerónimo* 29:12, 965–973
The liability rules under international GHG emissions trading *ZX Zhang* 29:7, 501–508
The politics of oil in Lithuania: strategies after transition *I Pasukeviciute and M Roe* 29:5, 383–397
The potential impact of policies to promote combined heat and power in US industry *P L Lemar Jr* 29:14, 1243–1254
The problem of used nuclear fuel: lessons for interim solutions from a comparative cost analysis *A Macfarlane* 29:15, 1379–1389
The renewable portfolio standard: design considerations and an implementation survey *T Berry and M Jaccard* 29:4, 263–277
Uncertainty in estimating and mitigating industrial related GHG emissions *M El-Fadel, M Zeinati, N Ghaddar and T Mezher* 29:12, 1031–1043
World bank energy projects in China: influences on environmental protection *E Martinot* 29:8, 581–594

Energy security and world trade

Changes in fuel input of electricity sector in Hong Kong since 1982 and their implications *L C-h Chow* 29:15, 1399–1410
CO_2 accounts for open economies: producer or consumer responsibility? *J Munksgaard and K A Pedersen* 29:4, 327–334
Interactions of a tradable green certificate market with a tradable permits market *P E Morthurst* 29:5, 345–353
The efficiency of international cooperation in mitigating climate change: analysis of joint implementation, the clean development mechanism and emission trading for the Federal Republic of Germany, the Russian Federation and Indonesia *W Fichtner, M Goebelt and O Rentz* 29:10, 817–830
The future of gas infrastructures in Eurasia *G Klaassen, A McDonald and J Zhao* 29:5, 399–413
Towards a private–public synergy in financing climate change mitigation projects *ZX Zhang and A Maruyama* 29:15, 1363–1377

Energy supply and demand

A study of sectoral energy consumption in Hong Kong (1984–1997) with special emphasis on the household sector *L C-h Chow* 29:13, 1099–1110
Accelerating residential PV expansion: supply analysis for competitive electricity markets *A Payne, R Duke and R H Williams* 29:10, 787–800
Addressing energy-related challenges for the US buildings sector: results from the clean energy futures study *J G Koomey, C A Webber, C S Atkinson and A Nicholls* 29:14, 1209–1221
An eclectic approach in energy forecasting: a case of Natural Resources Canada's (NRCan's) oil and gas outlook *A J Persaud and U Kumar* 29:4, 303–313
An evaluation of the impact of reducing energy subsidies on living expenses of households *Y Saboohi* 29:3, 217–225
Changes in fuel input of electricity sector in Hong Kong since 1982 and their implications *L C-h Chow* 29:15, 1399–1410
Future electric power technology choices of Brazil: a possible conflict between local pollution and global climate change *R Schaeffer and A S Szklo* 29:5, 355–369
Korean energy demand in the new millenium: outlook and policy implications, 2000–2005 *S H Kim, T H Kim, Y Kim and I-G Na* 29:11, 899–910
Low-CO_2 energy pathways and regional air pollution in Europe *S Syri, M Amann, P Capros, L Mantzos, J Cofala and Z Klimont* 29:11, 871–884
Participatory rural energy planning in India – a policy context *R C Neudoerffer, P Malhotra and P V Ramana* 29:5, 371–381
Reforms in the French power system: from weak contestability to effective competition? *D Finon* 29:10, 755–768
Strategies for cost-effective carbon reductions: a sensitivity analysis of alternative scenarios *E Gumerman, J G Koomey and M A Brown* 29:14, 1313–1323
Technology development in market networks *B Olerup* 29:3, 169–178
The politics of oil in Lithuania: strategies after transition *I Pasukeviciute and M Roe* 29:5, 383–397
The social cost of district heating in a sparsely populated country *E Bowitz and M D Trong* 29:13, 1163–1173
Waiting for the boom: a simulation study of power plant construction in California *A Ford* 29:11, 847–869

Energy technology

Disaggregated analysis of US energy consumption in the 1990s: evidence of the effects of

the internet and rapid economic growth *S Murtishaw and L Schipper* 29:15, 1335–1356
Drivers of market transformation: analysis of the Hungarian lighting success story *D Ürge-Vorsatz and J Hauff* 29:10, 801–810
Electricity sector analysis in the clean energy futures study *S W Hadley and W Short* 29:14, 1285–1298
Energy futures for the US transport sector *D L Greene and S E Plotkin* 29:14, 1255–1270
Future electric power technology choices of Brazil: a possible conflict between local pollution and global climate change *R Schaeffer and A S Szklo* 29:5, 355–369
Learning rates for energy technologies *A McDonald and L Schrattenholzer* 29:4, 255–261
Scenarios for a clean energy future *M A Brown, M D Levine, W Short and J G Koomey* 29:14, 1179–1196
Strategic considerations for clean coal R&D *J T McMullan, B C Williams and S McCahey* 29:6, 441–452
Technological progress and long-term energy demand – a survey of recent approaches and a Danish case *H K Jacobsen* 29:2, 147–157
Technology development in market networks *B Olerup* 29:3, 169–178
The potential impact of policies to promote combined heat and power in US industry *P L Lemar Jr* 29:14, 1243–1254

LDCs
A study of productivity in the Indian coal sector *M Kulshreshtha and J K Parikh* 29:9, 701–713
A time-series analysis of energy-related carbon emissions in Korea *K-H Choi and B W Ang* 29:13, 1155–1161
CO_2 emissions in the Brazilian industrial sector according to the integrated energy planning model (IEPM) *M T Tolmasquim, C Cohen and A S Szklo* 29:8, 641–651
Cooperation in global climate policy: potentialities and limitations *D Ipsen, R Rösch and J Scheffan* 29:4, 315–326
Do model structures affect findings? Two energy consumption and CO_2 emission scenarios for Brazil in 2010 *R C da Costa* 29:10, 777–785
Electricity tariffs in India: an assessment of consumers' ability and willingness to pay in Gujarat *R K Bose and M Shukla* 29:6, 465–478
Estimating CO_2 abatement and sequestration potentials for Chile *A Mosnaim* 29:8, 631–640
Ethanol as a lead replacement: phasing out leaded gasoline in Africa *V Thomas and A Kwong* 29:13, 1133–1143
Future electric power technology choices of Brazil: a possible conflict between local pollution and global climate change *R Schaeffer and A S Szklo* 29:5, 355–369
Impact on global warming of development and structural changes in the electricity sector of Guangdong Province, China *C Zhang, M M May and T C Heller* 29:3, 179–203
Incentive policies for natural gas-fired cogeneration in Brazil's industrial sector – case studies: chemical plant and pulp mill *J B Soares, A S Szklo and M T Tolmasquim* 29:3, 205–215
Participatory rural energy planning in India – a policy context *R C Neudoerffer, P Malhotra and P V Ramana* 29:5, 371–381
Policy reforms and productivity growth in India's energy intensive industries *P Mongia, K Schumacher and J Sathaye* 29:9, 715–724
Power sector reform and distributed generation in sub-Saharan Africa *J Turkson and N Wohlgemuth* 29:2, 135–145
Renewable energy investment by the World Bank *E Martinot* 29:9, 689–699
Rural household energy consumption with the economic development in China: stages and characteristic indices *W Xiaohua and F Zhenmin* 29:15, 1391–1397
Sustainable energy and urban form in China: the relevance of community energy management *B Sadownik and M Jaccard* 29:1, 55–65
Technology transfer of energy efficiency technologies in industry: a review of trends and policy issues *E Worrell, R van Berkel, Z Fengqi, C Menke, R Schaeffer and R O Williams* 29:1, 29–43
Towards a private–public synergy in financing climate change mitigation projects *ZX Zhang and A Maruyama* 29:15, 1363–1377

National and regional energy profiles and government policy
A study of sectoral energy consumption in Hong Kong (1984–1997) with special emphasis on the household sector *L C-h Chow* 29:13, 1099–1110
An evaluation of the impact of reducing energy subsidies on living expenses of households *Y Saboohi* 29:3, 245–252
Analysis of the impacts of carbon taxes on energy systems in Japan *T Nakata and A Lamont* 29:2, 159–166
CO_2 accounts for open economies: producer or consumer responsibility? *J Munksgaard and K A Pedersen* 29:4, 327–334
Credible regulatory threats *M Acutt, C Elliott and T Robinson* 29:11, 911–916
Emergence of financial markets for electricity: a European perspective *E Mork* 29:1, 7–15
Energy efficiency: the challenges of policy design *F Varone and B Aebischer* 29:8, 615–629
Energy intensity, CO_2 emissions and the environmental Kuznets curve. The Spanish case *J Roca and V Alcántara* 29:7, 553–556
European and Japanese fuel economy initiatives: what they are, their prospects for success, their usefulness as a guide for US action *S E Plotkin* 29:13, 1073–1084
Korean energy demand in the new millenium: outlook and policy implications, 2000–2005 *S H Kim, T H Kim, Y Kim and I-G Na* 29:11, 899–910
Modernise it, sustainabilise it! Swiss energy policy on the eve of electricity market liberalisation *M Jegen and R Wüstenhagen* 29:1, 45–54
Multi-lateral emission trading: lessons from inter-state NO_x control in the United States *A Farrell* 29:13, 1061–1072
New accountabilities in utilities: fifty years of legal accountability in the gas industry *L Conrad and C Waddams* 29:15, 1357–1361
Norwegian residential electricity demand – a microeconomic assessment of the growth from 1976 to 1993 *B Halvorsen and B M Larsen* 29:3, 227–236
On the potential impacts of land use change policies on automobile vehicle miles of travel *F Southworth* 29:14, 1271–1283
Participatory rural energy planning in India – a policy context *R C Neudoerffer, P Malhotra and P V Ramana* 29:5, 371–381
Policy reforms and productivity growth in India's energy intensive industries *P Mongia, K Schumacher and J Sathaye* 29:9, 715–724
Price caps and investment: long-run effects in the electric generation industry *J H Grobman and J M Carey* 29:7, 545–552
Privatizing and liberalizing electricity, the case of Hungary *G Bakos* 29:13, 1119–1132
Public goods and private interests: understanding non-residential demand for green power *R H Wiser, M Fowlie and E A Holt* 29:13, 1085–1097
Reforms in the French power system: from weak contestability to effective competition? *D Finon* 29:10, 755–768
Renewable energy policy in Lithuania *V Katinas and R Skema* 29:10, 811–816
The quality of energy intensity indicators for international comparison in the iron and steel industry *J C M Farla and K Blok* 29:7, 523–543
The Spanish distribution system for oil products: an obstacle to competition? *I Contin, A Correljé and E Huerta* 29:2, 103–111
US consumers' willingness to pay for green electricity *B Roe, M F Teisl, A Levy and M Russell* 29:11, 917–925

Nuclear power
Dismantling of nuclear power in Germany: sectoral and macroeconomic effects *H Welsch and C Ochsen* 29:4, 279–289
The problem of used nuclear fuel: lessons for interim solutions from a comparative cost analysis *A Macfarlane* 29:15, 1379–1389

Oil and gas
An eclectic approach in energy forecasting: a case of Natural Resources Canada's (NRCan's) oil and gas outlook *A J Persaud and U Kumar* 29:4, 303–313
Carbon emissions from manufacturing energy use in 13 IEA countries: long-term trends through 1995 *L Schipper, S Murtishaw, M Khrushch, M Ting, S Karbuz and F Unander* 29:9, 667–688
Ethanol as a lead replacement: phasing out leaded gasoline in Africa *V Thomas and A Kwong* 29:13, 1133–1143
Incentive policies for natural gas-fired cogeneration in Brazil's industrial sector – case studies: chemical plant and pulp mill *J B Soares, A S Szklo and M T Tolmasquim* 29:3, 205–215
Lost carbon emissions: the role of non-manufacturing other industries and refining in industrial energy use and carbon emissions in IEA countries *S Murtishaw, L Schipper, F Unander, S Karbuz and M Khrushch* 29:2, 83–102
New accountabilities in utilities: fifty years of legal accountability in the gas industry *L Conrad and C Waddams* 29:15, 1357–1361
The future of gas infrastructures in Eurasia *G Klaassen, A McDonald and J Zhao* 29:5, 399–413

The politics of oil in Lithuania: strategies after transition *I Pasukeviciute and M Roe* 29:5, 383–397
The Spanish distribution system for oil products: an obstacle to competition? *I Contín, A Correljé and E Huerta* 29:2, 103–111

Renewables

A transition toward a sustainable energy future: feasibility assessment and development strategies of wind power in Taiwan *C-D Yue, C-M Liu and E M L Liou* 29:12, 951–963
Accelerating residential PV expansion: supply analysis for competitive electricity markets *A Payne, R Duke and R H Williams* 29:10, 787–800
Citizen versus consumer: challenges in the UK green power market *S L Batley, D Colbourne, P D Fleming and P Urwin* 29:6, 479–487
Impacts of biomass power generation and CO_2 taxation on electricity generation expansion planning and environmental emissions *J Santisirisomboon, B Limmeechokchai and S Chungpaibulpatana* 29:12, 975–985
Interactions of a tradable green certificate market with a tradable permits market *P E Morthurst* 29:5, 345–353
Power sector reform and distributed generation in sub–Saharan Africa *J Turkson and N Wohlgemuth* 29:2, 135–145
Public goods and private interests: understanding non-residential demand for green power *R H Wiser, M Fowlie and E A Holt* 29:13, 1085–1097
Renewable energy investment by the World Bank *E Martinot* 29:9, 689–699
Renewable energy policy in Lithuania *V Katinas and R Skema* 29:10, 811–816
Renewables portfolio standard: a means for trade with electricity from renewable energy sources? *S Espey* 29:7, 557–566
Short-cut design of wind farms *C T Kiranoudis, N G Voros and Z B Maroulis* 29:7, 567–578
The renewable portfolio standard: design considerations and an implementation survey *T Berry and M Jaccard* 29:4, 263–277
US consumers' willingness to pay for green electricity *B Roe, M F Teisl, A Levy and M Russell* 29:11, 917–925

The role of utilities

Accelerating residential PV expansion: supply analysis for competitive electricity markets *A Payne, R Duke and R H Williams* 29:10, 787–800
Credible regulatory threats *M Acutt, C Elliott and T Robinson* 29:11, 911–916
Electricity tariffs in India: an assessment of consumers' ability and willingness to pay in Gujarat *R K Bose and M Shukla* 29:6, 465–478
Finessing the unintended outcomes of price-cap adjustments: an electric utility multi-product perspective *D Q Seeto, C K Woo and I Horowitz* 29:13, 1111–1118
From planning to strategy in the electricity industry *I Dyner and E R Larsen* 29:13, 1145–1154
New accountabilities in utilities: fifty years of legal accountability in the gas industry *L Conrad and C Waddams* 29:15, 1357–1361
The financing of the Mexican electrical sector *J Islas and U Jerónimo* 29:12, 965–973
The potential impact of policies to promote combined heat and power in US industry *P L Lemar Jr* 29:14, 1243–1254
